MS-Office 2007

Microsoft Word 2007 uses a new file format incompatible with earlier version of the program. Microsoft has made available a utility to access Word 2007 files in Word 2000/XP/2003. With the growing usage of Word 2007, our technical staff is installing this utility on an as needed basis. If an immediate need arises you can obtain this patch at:

By installing the Compatibility Pack for Microsoft Office 2000, Office XP, or Office 2003, you will be able open, edit, and save files using the file formats new to Word, Excel, and PowerPoint 2007. The Compatibility Pack can also be used in conjunction with the Microsoft Office Word Viewer 2003, Excel Viewer 2003, and PowerPoint Viewer 2003 to view files saved in these new formats. For more information about the Compatibility Pack, see Microsoft Knowledge Base article 924074.
